

Please leave XM Radio alone. We love them and if they want to offer traffic and weather what is wrong with that? Try them out sometime then drive another car without it you will see that all local radio stations across the country suck. XM is great and please leave them alone and dont let all the big lobby people put money in your pocket and make you change some rules. Seems to me if you served us the way you should the lobbist would never be around because you all would say get out dont need ya here.,
thank,
Brock Wills
